

ENERGY EFFICIENCY TESTING & EVALUATION SERVICES

OnSpeX offers leading-edge product performance testing and evaluation services. Our expertise in product design consulting, product specifications, product comparison testing, inspections and audits is delivered globally from offices across North America, Europe and Asia.

Our Team has the knowledge and expertise to help you accurately determine the Energy Efficiency of your products and components. We offer customized Energy Efficiency performance testing to meet the specific demands of your target market and specialize in testing to performance requirements such as ANSI/ASHRAE, ANSI/UL, CSA, and DOE standards.

OnSpeX Product Evaluation Capabilities

- Flow through Chambers for Water Heating Products
- First Hour Rating / 24 Hour Test
- Comprehensive Data Acquisition
- Environmental Testing
- Frequency, Phase, Voltage, Speed, Temperature, Horse Power, Electrical & Amperage Monitoring
- Combustion Efficiency Determination
- Annual Energy Consumption
- Emissions Analysis
- Maximum GPM Rating
- Annual Fuel Utilization Efficiency Determination

Listed below are a few examples of the products OnSpeX can test and evaluate. Please contact us for more information on your product needs.

Appliances	HVAC	Electronics	Home Office Equipment & Lighting Products
Washing Machines	Vent Heaters	Televisions	Printers
Dishwashers	Furnaces	Home Audio Equipment	Fax Machines
Ranges	Air Conditioners	Batteries	Mailing Machines
Ovens	Ceiling Fans	Monitors	Computers
Refrigerators	Heat Pumps	Telephones	Copy Machines
Freezers	Water Heaters, Boilers	Chargers	Ballast, LED & Florescent
Water Coolers	Pool Heaters	Power Generators	Lighting
Microwaves	Dehumidifiers		UPS - Uninterrupted Power Supply
Clothes Dryers	Humidifiers
